

SIVAVETRIVEL M

Data Engineer | ETL Developer

Chennai, Tamil Nadu | 8248736004 | vetri1998kpr@gmail.com | linkedin.com/in/sivavetrivel-m | GitHub

PROFESSIONAL SUMMARY

Data Engineer with **1+ year of hands-on industry experience** in designing, developing, and maintaining **scalable cloudbased ETL pipelines** using **AWS S3, Databricks, Delta Lake, and Jenkins**. Strong expertise in managing **full and incremental (delta) data loads**, implementing **CI/CD automation**, and enforcing **data quality validations using Databricks SQL**. Experienced in working within **Agile Scrum environments**, using **Jira for task tracking, sprint planning, and issue management**. Proven ability to collaborate with Salesforce, QA, and business teams to deliver analytics-ready datasets. Actively expanding **full-stack web development skills** to build efficient, data-driven applications.

EDUCATION

Bachelor of Engineering – Computer Science & Engineering

Sardar Raja College of Engineering, Anna University

2025

Diploma in Computer Engineering

MSPVL Polytechnic College, DOTE

2022

SSLC

St. Assisi Matric Hr. Sec. School, Pavoorchatram

2019

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, HTML, CSS

Frameworks: Django, Flask

Databases: MySQL, PostgreSQL, SQLite

Cloud & Big Data: AWS (S3, EC2, Lambda, Glue, IAM), Databricks, Delta Lake, Salesforce Integration

DevOps & Collaboration Tools: Jenkins, Git, **Jira**, Visual Studio Code

Methodologies & Core Skills: ETL Pipeline Development, Data Ingestion & Transformation,

Delta Lake Processing, CI/CD Automation, Data Validation & Testing, Pipeline Monitoring,

Agile Scrum Methodology, Sprint Planning, Backlog Grooming, Web Application Development

PROFESSIONAL EXPERIENCE

Data Engineer

DataKalamIT Pvt Ltd | Jul 2025 – Present

- Designed and maintained **end-to-end ETL pipelines** using **AWS S3, Databricks, and Delta Lake**.
- Executed **full-load and incremental (delta) ETL workflows** across **Dev, QA, and higher environments**.
- Built and optimized **Jenkins CI/CD pipelines** to automate ETL deployments, significantly reducing manual effort.
- Developed **Databricks SQL data quality checks** to ensure accuracy, consistency, and reliability of datasets.
- Participated in **Agile Scrum ceremonies** including daily stand-ups, sprint planning, reviews, and retrospectives.
- Tracked development tasks, bugs, and enhancements using **Jira**, ensuring timely delivery of sprint goals.
- Collaborated with **Salesforce integration and business teams** to deliver validated, analytics-ready datasets.
- Authored and maintained **technical documentation** covering ETL logic, data mappings, and deployment steps.

Data Engineer Intern

DataKalamIT Pvt Ltd | Jan 2025 – Jun 2025

- Supported **Databricks ETL pipelines** by performing data load validation, schema checks, and log monitoring.
- Assisted in executing **full and delta data loads** under Agile sprint timelines.
- Updated and validated **Jenkins deployment jobs**, ensuring successful ETL executions.
- Logged and tracked ETL defects and enhancements using **Jira**.
- Performed **initial-level ETL testing and debugging** and documented validation procedures.
- Coordinated with Salesforce teams for **data sync verification and reporting accuracy checks**.

PROJECTS

Automated Data Pipeline for Business Analytics

AWS S3 | Databricks | Delta Lake | Jenkins

- Designed and executed **scalable ETL pipelines** to ingest structured and semi-structured data from multiple source systems.
- Applied **full-load and incremental ingestion strategies** to efficiently process large datasets.
- Automated workflow orchestration using **Jenkins**, reducing manual operational effort by **60%**.
- Implemented **Databricks SQL validation rules** to ensure high-quality, reliable data outputs.
- Delivered **business-ready datasets** integrated with Salesforce reporting.
